WORK EXPERIENCE

Frontend Intern, Foothill Technology Solutions, LLC.

July. 2023 – Jan. 2024

- Training on: Git, Typescript, ReactJS, JS, HTML, CSS...
- Final Project: [Travel and Accommodation Booking Platform](#)

RELATED PROJECTS

A Website for the Palestinian Tabou – MERN stack

- The objective of this project entails the creation of a website for the Land Registry Department, in collaboration with the Palestinian government.
- The document can be accessed in the Redmi file on GitHub and is also available as a PDF file within the Repository. ([Link](#))

Portfolio Project – React & Bootstrap & CSS

- I independently developed a project to build my personal profile from scratch.
- Apply front-end concepts such as routing, animation, and layout, to create a responsive and visually appealing design.
- finally, the result is successful and polished personal profile.

I uploaded it on Vercel hosting you can view it. ([Link](#))

Source code on GitHub. ([Link](#))

Rest API for Bank System – Express & MongoDB

- A real-world Bank System with registration, login, with JWT authentication.
- Apply the concept of pagination and validation and authorization with three roles.
- I designed and built a database architecture from scratch, the class diagram that can be found in the README file on GitHub. ([Link](#))

Prototype pattern - Java

- Implementation for prototype pattern in both types Shallow Clone and Deep Clone.
- Applying OOP principles. ([Link](#))
